VIO® 3
plug and operate
We have been a pioneer in the development of electrosurgery for over 90 years, gathering experience you can count on.

Our promise when it comes to technology:

High-tech and safety are our passion.

Multiprocessor technology
15 processors facilitates superior system performance

Power electronics
Regulated power supply adapter$^1$ improves power output especially with high and varying impedance loads, e.g. during bipolar resection

Latest digital signal processors
25 million measurements/sec improves reproducibility of the tissue effect$^2$
We have shaped electro-surgery, developing it into today’s leading-edge operating room technology. This has made us an essential and reliable partner for many users. VIO® 3 is yet another of our milestones in technology, following the ICC unit series and VIO® 300/200. Utilize the innovative advantages the VIO® 3 has to offer.

WHY ERBE?

☑ Experts in electrosurgery for over 90 years
☑ Highest priority of our products: safety
☑ We set benchmarks and drive innovative developments
☑ Global sharing of experience and knowledge transfer
☑ Presence and support worldwide
☑ Internationally trusted partner

The WiFi communication interface
The basis for wireless communication, e.g. for future OR integration
With its logical and intuitive interface, the VIO³ 3 is designed to ensure optimal user-friendliness. The size of the touchscreen display alone speaks for itself: from the operating field, the surgeon always has a clear view of all control elements. As your stepGUIDE, VIO³ 3 provides guidance by suggesting experienced starting settings used in various clinical applications. This results in less setting adjustment or modifications.

Plug and operate.
It couldn’t be easier.

90% of all users feel VIO³ 3 is easier to use.
plug and operate

RAPID ACCESS TO THE REQUIRED PROGRAM

EASY MODE ADJUSTMENT VIA EFFECT SETTINGS

INCREDIbLY SIMPLE, GUIDED OPERATION USING “stepGUIDE”

REMODe® FUNCTION: SELECTION OF UP TO 6 SUB-PROGRAMS DIRECTLY FROM THE OPERATING FIELD

MULTILINGUAL INTERFACE

PROGRAM-SPECIFIC SETTING, ALSO FOR STANDARD INSTRUMENTS
Multi-modality modes for various clinical specialities

VIO® 3 has the right mode for your application, supporting monopolar and bipolar techniques and our proprietary hybrid technology – a combination of different technology.

It has never been easier to achieve the desired mode-specific tissue effect using just one setting – the effect setting.

The effects can be selected in extremely fine increments using just one adjustment control. The change in effect is shown on the display.

19 OPTIMIZED MODES

The right modes for your application adapted to your instrument selection

PRECISE EFFECT SETTINGS

Adjusting the selected mode has never been easier via the effect setting

HIGH REPRODUCIBILITY

Advanced measurement technology
Consistent cutting and coagulation effects

HOMOGENOUS TISSUE EFFECTS

VIO® 3 responds to parameter changes in the tissue immediately
Regardless of the electrode shape or incision technique
The new VIO® 3 modes

**preciseSECT**
Low-smoke exposure

Dynamic adjustment of the modulation frequency makes this new mode ideally suited for exposing structures. preciseSECT facilitates rapid and effective coagulation with limited tissue-separating properties, in combination with less development of smoke and carbonization.

Disciplines: General / visceral surgery, gynecology, urology

**thermoSEAL®**
Rapid vessel sealing

With the new AUTO START, thermoSEAL® is twice as fast as the BiClamp® mode. And this mode permanently measures the tissue parameters while sparing lateral tissue. This makes thermoSEAL® ideal for sealing tissue bundles and vessels as well as for coagulating bleedings extremely efficiently.

Disciplines: General / visceral surgery, gynecology, urology

**highCUT bipolar**
Bipolar resection

This new mode has been optimized for bipolar resection in a saline solution. The power peak system (PPS) enables rapid incision. The stable plasma facilitates rapid cutting.

Instruments: Bipolar resectoscopes

**softCOAG®**
Accelerated coagulation

Now with QuickStart: in the case of bipolar and monopolar softCOAG®, a short pulse of energy on contact with tissue results in accelerated coagulation.

Application: Coagulation for laparoscopic procedures

92% of all users feel preciseSECT is better.
Overview of modes

Our modes are regulated to a constant voltage level continually adapting output power to changing parameters to achieve reproducible tissue effects. Fine adjustment has never been easier, simply by selecting an effect. You can choose from 19 finely-adjustable CUT and COAG modes:

- **autoCUT**
  - Smooth incisions, minimum to moderate hemostasis

- **highCUT**
  - Smooth incisions, minimum to moderate hemostasis. For tissue with poor conductive properties and monopolar resection using non-conductive irrigation liquids

- **dryCUT®**
  - Controlled incision with significant hemostasis

- **autoCUT bipolar**
  - Smooth incisions, minimum to moderate hemostasis, e.g. for BiSect laparoscopic scissors

- **highCUT bipolar**
  - Smooth incisions, minimum to moderate hemostasis. For bipolar resection in a saline solution

- **endoCUT® Q**
  - Fractionated cutting mode with cutting and coagulation intervals, e.g. for polypectomy snare

- **endoCUT® I**
  - Fractionated cutting mode with cutting and coagulation intervals, e.g. for sphincterotome
<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>preciseSECT</strong></td>
<td>Optimized exposure as a result of dynamically adapting modulation. Medium coagulation</td>
</tr>
<tr>
<td><strong>swiftCOAG®</strong></td>
<td>Intensive coagulation, enhanced with slight tissue-separating properties</td>
</tr>
<tr>
<td><strong>softCOAG®</strong></td>
<td>Slow, deep coagulation with no tissue carbonization⁶, e.g. for use with ball electrode for tissue devitalization or with monopolar scissors</td>
</tr>
<tr>
<td><strong>forcedCOAG®</strong></td>
<td>Effective and fast “standard” coagulation with moderate to intense hemostasis</td>
</tr>
<tr>
<td><strong>sprayCOAG®</strong></td>
<td>Non-contact, efficient surface coagulation with low penetration⁶</td>
</tr>
<tr>
<td><strong>twinCOAG®</strong></td>
<td>Consistent tissue effects, even when two monopolar instruments are activated at the same time with just one unit</td>
</tr>
<tr>
<td><strong>softCOAG® bipolar</strong></td>
<td>Slow, deep coagulation with no tissue carbonization⁶, e.g. for use with bipolar coagulation instruments and bipolar resectoscopes</td>
</tr>
<tr>
<td><strong>forcedCOAG® bipolar</strong></td>
<td>Fast bipolar coagulation with moderate to intense hemostasis</td>
</tr>
<tr>
<td><strong>thermoSEAL®</strong></td>
<td>Special COAG mode for sealing highly-vascularized tissue bundles and blood vessels with a diameter of up to 7 mm using appropriate Erbe instruments⁷</td>
</tr>
<tr>
<td><strong>forcedAPC</strong></td>
<td>Fast “standard” argon plasma coagulation, e.g. for hemostasis of diffuse bleeding, ablation and tissue reduction</td>
</tr>
<tr>
<td><strong>pulsedAPC®</strong></td>
<td>Argon plasma coagulation with reduced application of energy as a result of pulses, e.g. flexible APC probes</td>
</tr>
<tr>
<td><strong>preciseAPC®</strong></td>
<td>Fine argon plasma coagulation, largely independent of the distance to the target tissue, e.g. for flexible APC probes, where tissue thickness is a concern</td>
</tr>

</table>
Expanded choice in instrument selection

You can plug standard instruments into any universal socket reducing risk of confusion. Use up to 6 instruments of your choice (including APC) in accordance with your procedure. The connection options offered by VIO® 3 support a larger number instrument combination. Each socket supports the AUTO START function for bipolar instruments.

EXPANDED INSTRUMENT SELECTION

4 monopolar, 4 bipolar, 4 plug & play instruments (e.g. BiClamp®) or any combination thereof.

RECOMMENDED CONNECTION

Based on pre-programmed settings the stepGUIDE supports you in selecting a socket for your chosen instrument.

UNIVERSAL SOCKET ¹

Standard instruments can be inserted into any universal socket.

SLOT ASSIGNMENT

The active slot and the instrument in use are shown on the display and through the illuminated socket frame.
When using APC 3, you can extend your options and insert up to 6 instruments of your choice.

Sockets can easily be replaced without opening the casing.
Your direct link –
the Erbe support app

With the support app, you can generate and update user programs using templates and archive these on our server. Our staff and distributors can update and upgrade your VIO® 3 on site using VIO® WiFi (PC or tablet).

Using our support app, you can expand the performance spectrum of the VIO® 3. You can procure it from the app Store. It will be cleared for use after successful registration on our website.

With our support app you can also use your personal programs on other in-house VIO® 3 systems or externally, for example for live surgeries and workshops. This gives you access to your own personal setting configurations anywhere, anytime.
WHY VIO® 3?

☑ Reliably reproducible tissue effects thanks to state-of-the-art processor technology
☑ Fine-tuning of tissue effects using our improved effect setting is easy and more precise
☑ Multi-modality modes for various applications
☑ Multi-disciplinary ESU
☑ User-friendly with logical, convenient and visual user navigation (stepGUIDE)
☑ Selection of up to 6 different settings for your procedure from the operating field
☑ Use of up to 6 instruments of your choice
☑ Supports proprietary Erbe hybrid technology
☑ Upgrade compatibility with software, hardware and workstation modules

BENEFITS FOR YOU:

96% of all users would recommend VIO® 3

Important information
We have prepared this document with care. Nonetheless, we cannot completely rule out errors in this document.

The information, recommendations and other data ("Information") contained in this document reflect our state of knowledge and the state of science and technology at the time of preparing the document. The information is of a general nature, non-binding and serves solely for general information purposes and does not represent instructions for use or notes on application.

The information and recommendations contained in this document do not constitute any legal obligations by Erbe Elektromedizin GmbH as well as their associated companies ("Erbe") or any other claims against Erbe. The information does not represent a guarantee or other quality statement, these require the express contractual arrangement with Erbe in individual cases.

Erbe shall not be liable for any type of damage resulting from following information given in this document, regardless of the legal reason for liability.

Every user of an Erbe product is responsible for checking the respective Erbe product for its properties as well as the suitability for the intended type of application or intended purpose in advance. The suitable type of application of the respective Erbe product is given by the user manual and the notes on use for the corresponding Erbe product. The user is obliged to check whether the existing user manual and the notes on use correspond with the status for the specific Erbe product. The devices may only be used according to the user manual and the notes on use.

The information on setting values, application sites, duration of application and the use of the respective Erbe product is based on the clinical experience of physicians independent from Erbe. They represent guidelines which need to be checked by the user for their suitability for the actual planned application. Depending on the circumstances of an actual application case, it may be necessary to deviate from the information provided. The user has to check this on his/her own responsibility in each case when using an Erbe product. We wish to point out that science and technology is constantly subject to new developments arising from research and clinical experience. For this reason it may be necessary for the user to deviate from the information provided in this document.

This document contains information about Erbe products which may possibly not be approved in a specific country. The user of the respective Erbe product is obliged to inform him/herself whether the Erbe product he/she is using is legally approved in his/her country and/or if legal requirements or restrictions for use possibly exist and to which extent.
